Project abstract (+/- 1000 characters maximum)

BC Platforms, Euformatics and Oncompass Medicine continue to act as a consortium of leading European clinical genomics data analysis tool providers that together represent the state of the art and beyond for functionality sought after in Instand-NGS4P program. We will supplement this with new innovations for the project, meeting and exceeding the requirements. BC Platforms (BCP) and Euformatics (EUF) have R&D operations in Finland and Oncompass Medicine (OCM) has R&D operation in Hungary. The Tender identifier "EU ONCO-PLATFORM" is meant to reflect all three companies (EUformatics-ONCOmpass-BC PLATFORMs).

In the upcoming Phase 3 of Lot 4, EU Onco-Platform provides a unique opportunity to integrate precision oncology with the Buyers' IT environment and Lot 3 bioinformatics solutions to provide state of the art in terms of reporting and e-medication. All members have years of experience in clinical reporting of NGS results, and there is a significant synergy among the members with different backgrounds and business areas. Proven by the pre-existing reporting tools, all members are capable of innovating and meeting patients' and carers' needs in terms of reporting NGS results.

Previous EU funding

Is the project based on / a continuation of R&D activities that were previously funded by the EU?: NO
