<p><b>Project abstract (+/- 1000 characters maximum)</b></p> <p>Congenica is building a fully automated analysis, interpretation and reporting pipeline to meet the requirements as laid out by Lots 3 and 4 of the program. The product is designed to improve clinical workflows, deliver rapid treatment recommendations and allow clinicians rapid access to patient-relevant information.</p> <p>For Lot 3 Congenica will deliver a fully automated secondary pipeline including automated variant calling and classification to be integrated with the required touchpoints within the full workflow. The solution will align with disease specific requirements, differing sample types &amp; SOPs. All results obtained from the Lot3 workflows will be passed on to the Lot 4 system for the next stage in the process.</p> <p>For Lot 4 Congenica will develop an automated reporting application that provides region-specific therapy guidance in a user-friendly and stakeholder-oriented format. Patients will be able to receive a secure version of the report with an easy-to-understand explanation of the findings, recommended treatment options, eligibility for clinical trials, and an overview of the potential side-effects that they may have to expect.</p>			
<p><b>Previous EU funding</b></p> <p>Is the project based on / a continuation of R&amp;D activities that were previously funded by the EU?: <b>NO</b> If yes, identify this EU funding: N/A</p>
